PROFESSIONAL OBJECTIVES.

I am a self-taught software engineer with two years of experience and a strong product management background. At Invisible Technology, I use **JavaScript, SQL, and Python** to design and engineer prompts for some of the world's leading AI models, consistently achieving a **code quality score of 97%**. At Bragnic Studio, I provided technical support on a B2B property management application built with **WordPress, JavaScript, React, TypeScript, and NextJS**, ensuring smooth operations for over **3,000 units and 1,000 tenants monthly**. At Estate Intel, I managed a real estate marketplace and reports database using **WordPress, VueJS, and PHP**, resolved **technical issues**, and created **API documentation** that facilitated contracts worth over **£1.5 million**. My strengths are identifying and addressing customer needs, resolving technical challenges efficiently, and collaborating with engineering teams to deliver seamless solutions and excellent support.

SKILLS AND CORE COMPETENCES.

JavaScript, Typescript, React, Node.js, Vue, Next.js, Nuxt.js, Redux, Python, Powershell, Bash, SQL, NoSQL, Jira, Linear, AWS, GCP, REST APIs, Datadog, Grafana, API Documentation.

RELEVANT EXPERIENCE.

Software Engineer Advanced AI Trainer (Contract) / Invisible, Remote, USA. **Apr 2024 - Date.**
Using Python, SQL, Git, Javascript, Typescript, and Jinja2, I do the following:

- Prompt designing and engineering ideal code responses in Javascript and Python from AI models.
- I ranked over 3,000 AI model code responses, ensuring code correctness, quality, and readability following the client's standard operating procedure (SOP), achieving a 95% QA score.
- Code Quality Analyst on the pilot team, annotating over 150 code tasks weekly using reasoning, data structures, Javascript, and Python while achieving a 98% QA score.

Support Engineer (Contract) / Bragnic Studios, Remote, UK. **Jan 2024 - Oct 2024.**
Using Javascript, NextJS, REST APIs, Typescript, and React, I have been able to achieve the following:

- Provided technical support and collaborated with five engineers to deliver end-to-end property management software, ensuring seamless operations for over 2,000 units and 3,000 tenants within six months.
- Assisted with troubleshooting and enhancing front-end functionality for the parent and staff sections of a learning management platform, improving user experience and engagement.

Support Engineer / Estate Intel, Remote, NGA. **May 2021 - Jan 2024.**
Working with Laravel PHP Javascript, Typescript, and Vue, I was able to achieve the following:

- Designed the REST API architecture for Africa's first real estate data API that handled **1,000+ API calls daily**. Developed two products: **Vesper** and **Build** as Proof of Concepts.
- Demonstrated strong stakeholder management skills by maintaining a 95% satisfaction rate among 5,000+ contractors and enterprise clients while facilitating £1.5m+ of real estate contracts.

Support Engineer / ValueJet Airlines, Lagos, NGA. **Dec 2019 - May 2021.**
Working with Grafana, Zendesk, Javascript, Python, and React, I was able to achieve the following:

- Implemented Agile methodologies in cross-functional product development, increasing team productivity by 20% and ensuring on-time delivery of all project milestones while collaborating with engineering, marketing, and data science teams.
- Collaborated with a backend developer to design and implement APIs, facilitating efficient and effective data integration.

RELEVANT PROJECTS.

[Eat and Split](#)

2024.

Simple eat and split React App that lets you select or add a friend to split a bill with.

- Tech: HTML, CSS, React, and Javascript.

[Travel List](#)

2024.

Travel list React App that lets you itemize a list of things you need to pack for your next trip!

- Tech: HTML, CSS, React, and Javascript.

[UsePopCorn](#)

2024.

Simple eat and split React App that lets you select or add a friend to split a bill with.

- Tech: HTML, CSS, React, and Javascript.

RELEVANT CERTIFICATIONS.

Full Stack Engineering (React, Javascript, Python, and Node JS)

2024.

The App Brewery.

Agile Project Management Foundation

2024.

APMG International.

Professional Scrum Product Owner

2024.

Scrum.org.

AI Product Management

2024.

Udacity.

Intermediate Machine Learning

2024.

Kaggle Learning.

EDUCATION.

Masters in Business Administration

2023.

University of West London.

- Project Management. Strategy. Finance. Leadership.

Bsc. Electronic and Electrical Engineering

2019.

Obafemi Awolowo University.

- Python. Matlab. Control Systems. Mathematics.
